

Type: Tempo

⌵ Settings

Name

tempo

Default

Before you can use the Tempo data source, you must configure it below or in the config file. For detailed instructions, [view the documentation](#).

Connection

URL *

http://tempo:3200

Authentication

Authentication methods

Choose an authentication method to access the data source

Authentication method

No Authentication

TLS settings

Additional security measures that can be applied on top of authentication

- ☒ Add self-signed certificate
- ☐ TLS Client Authentication
- ☐ Skip TLS certificate validation

HTTP headers

Pass along additional context and metadata about the request/response

Streaming

Enable streaming for different Tempo features. [Learn more](#)

Streaming and self-managed Tempo instances

If your Tempo instance is behind a load balancer or proxy that does not supporting gRPC or HTTP2, streaming will probably not work and should be disabled.
